

PRIMUS RF25

The Cross Point PRIMUS series is the logical choice for those retailers requiring a compact designed, reliable performing Electronic Article Surveillance system.

It is powered by Cross Point's proven digital XR-23G electronics which automatically adjusts itself to any type of environment for optimal detection quality under all circumstances.

The Cross Point PRIMUS series is available in two different models: a LUNA with optical alarm indicators and a NUDA without these optical alarm indicators.

A step blocker prevents children from climbing into the antenna. Optional panels can be printed with the store's logo to enhance the physical appearance.

Unique features

Anodized aluminum frame, slim-line design

Proven detection characteristics

Optional printable transparent panels

PRIMUS RF Antenna Line
