CS 300 KF

BIZERBA

The CS 300 KF reliably integrates in existing cash register solutions. Due to the extremely high availability and its flexible interface protocols this weighing system can be perfectly integrated in your cash register system.

More information
High performance
with a wide range of
solutions and options.

Product description

The Bizerba CS 300 KF expands the cash register solution to a complete POS workstation. Take advantage of our modular concept that can be customized to your needs: Flexibly connect our external load receptor of type CS 300 KF to a hardware or software display. Even when space is at a premium, price-exact weighing is ensured with the stand-alone solution. The checkout process is optimized.

The unit price – optionally with or without tare value – is transferred from the cash register to the scale which then calculates the selling price on the basis of the weight determined. Numerous interfaces to the common cash register systems are already included in the standard version. Optionally, you can choose between a software display and a hardware display. The operating keys for zero setting and opening the scale menu are integrated in the displays or if a software display is used, they are integrated into an optional external operating element.

CS 300 KF with P display

CS 300 KF with WS display

Highlights

- RS232 and USB interfaces for connection to current and future POS systems included in the standard
- Data dialogs for common cash register systems included in the standard
- Hardware and software display to show weight and price
- Reliable, high performance multi-interval weighing system - made in Germany

Options

- Software display license for the metrologically approved display of the weighing data on the POS display
- Separate one- or double-sided P display (weight, unit price, selling price and tare) on a column or mounting bracket
- Separate one-sided WS display (weight) on a column or mounting bracket
- External operating element (tare/zero setting key)

My Bizerba

We offer you solutions from a single source which can be customized and allow you to respond to any change in a flexible manner. Benefit from costs which can be planned and efficient processes. We are happy to advise you.
