# BIZERBA

*The CS 300 reliably integrates in existing scanner solutions in the checkout area Due to the extremely high availability and its flexible interface protocols this weighing system can be perfectly integrated in your cash register system.*

**More information**  
High performance  
with a wide range of  
solutions and options.

### Product description

The Bizerba CS 300 family is impressive in terms of its smooth integration capacity in cash register and scanner solutions. Due to the combination of a Bizerba checkout scale with the Datalogic Magellan™ 9800i imaging scanner, weighing with exact pricing in a compact device can be ensured even when space is at a premium. In just a few simple steps the CS 300 MA 9803 can be integrated in the Magellan™ 9800i.

Scanning and weighing are combined and the cashing process optimized. The unit price – optionally with or without tare value – is transferred from the cash register to the scale which then calculates the selling price on the basis of the weight determined. Numerous interfaces to the common cash register systems are available as a standard. Optionally, you can choose between a software display and a hardware display. The operating keys for zero setting and opening the scale menu are integrated in the scanner and, if a software display is used, allow a particularly compact and tidy cash register workstation.

CS 300 MA 9803

Bizerba weighing system

### Highlights

- Support of Datalogic ScaleSentry™ function of the scanner for minimizing weighing losses
- Zero setting and access to the scale menu using the scanner for ergonomic operation
- RS232 and USB connection for connection to current and future POS systems included in the standard
- Hardware and software display to show weight and price
- Data dialogs for common cash register systems included in the standard
- Reliable, high performance multi-interval weighing system - made in Germany

Bizerba strain gauge load cell

### Options

- Software display license for the metrologically approved display of the weighing data on the POS display
- Separate one- or double-sided P display (weight, unit price, selling price and tare) on a column or mounting bracket
- Separate one-sided WS display (weight) on a column or mounting bracket

### My Bizerba

We offer you solutions from a single source which can be customized and allow you to respond to any change in a flexible manner. Benefit from costs which can be planned and efficient processes. We are happy to advise you.
